French

English

### PROFILE

Passionate about IT, I have gained significant experience as a full-stack web developer, specializing in designing and integrating API(s) within professional environments. I have a strong ability to quickly learn new technologies and successfully complete projects, whether working collaboratively or independently.

### PROFESSIONAL EXPERIENCE

#### Full Stack Web Developer

YOUNG MEDIA

Cotonou, Benin (**Full Remote**)

Aug. 2023 -

- Design and development of custom APIs using state-of-the-art technologies such as Django, Strapi and others.
- Thorough review of specifications and meticulous drafting of specifications to guide project implementation.
- Creation and optimization of user interfaces consuming various APIs with ReactJS.
- Contributed to the analysis and development of multiple projects on the WordPress platform.

#### Backend Developer

AXETAG

Montpellier, France (**Full Remote**)

March 2022 - Dec. 2023

- Development of Flask API (Python) for secure management of secrets and cloud resources, enhancing security and productivity.
- Implementation of the OpenID Connect protocol (OIDC) for secure, unified authentication, simplifying access to applications and strengthening data protection.
- Configuration of DAG with Airflow to automate recurring processes, reducing manual errors and improving operational efficiency.
- Implementation of a MySQL replication system to guarantee high data availability, ensuring constant access to reliable data and minimizing downtime.

#### Ruby On Rails Developer

ETRILABS - INTERN

Parakou, Bénin

Aug. 2021 - dec. 2021

- Production of several web applications, including Facebook, Twitter and Instagram clones, using the Ruby on Rails (ROR) framework.
- Deployment and hosting of web applications with Netlify and GitHub, ensuring optimal accessibility and availability of online applications, while simplifying the deployment and update management process.
